

Immunization Requirements for International Students

Tdap: Vaccination must have been received within the last 10 years. Tdap preferred over TD due to recent pertussis outbreak.

MMR: Two vaccinations are required. The first MMR vaccination must have been received on or after the first birthday.

If one or both vaccinations have been received before the first birthday, then the student must receive another MMR vaccination.

There must be at least four weeks between MMR dose #1 and MMR dose #2.

Meningitis Vaccination (Groups A, C, Y, and W-135): Vaccination for meningitis is mandatory if the student is under the age of 23 years and is attending UNR. Vaccination with at least one dose of a quadrivalent meningococcal conjugate vaccine (MCV4) on or after age 16 years will satisfy this requirement. Although meningococcal Group B or C vaccines are not a requirement, it is recommended that students receive the vaccines before coming to campus.
